  4. Co-operation has built up between schools, society and Government.

Third and fourth conclusions were different in Teachers. Principals and CRC’s view, other all were same.

8. Educational Implementation
Implementations are as follows.

1. In this study Teachers, Principals and CRC’s of Government primary school and positive views. It can be said that the main objective of this program is to test the level of Teacher’s educational awareness student’s educational capacity, quality of education and solve grievances. Which is proved successful.
2. It can be known that still some schools does not use classroom properly.
3. Due to grade system schools are given grades that decides it’s quality and gives guidance accordingly.
4. It can be concluded that due to such program quality of education is increased. So such more programs must be done.
5. It can be seen that assigned officers does not reaches to teachers view but they give true guidance, solution and give real reasons to officers of education department than its real Gunotsav.
6. Teachers, Principals, Parents, Officers and Government must work together to make this program more successfully.
7. To develop internal talent of student’s teachers must use different methods in teaching and become role model for them.
8. Training program for teachers must be organised by Gujarat Government and GCERT so that they remain in touch with new ways of education and make positive change in quality.
